## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 - 2, drawn to a speaker grille-integrated foamed thermoplastic resin molding for automotive interior, classified in class 428, subclass 138.
  - II. Claims 3 - 8, drawn to a method for producing a speaker grille-integrated foamed thermoplastic resin molding for automotive interior, classified in class 264, subclass 45.5.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group II, claims 3 – 8 and Group I, claims 1 - 2 are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a materially different process such as molding the automotive interior piece as one solid piece and hole punching the speaker grille into the desired shape.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Kendrew Colton on October 15, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1772

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
